Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

To have a general inventive concept under PCT rule 13.1, the inventions need to be linked by a special technical feature. Two special technical features appear to be drawn to the detection of lysosome proteins (saposin, LAMP, and alpha glycosidase) in lysosomal disorders. However reference, Placenta (November 1998) to Chataway et al. teaches that IP-30, saposin D, cathepsin B & D, beta hexosaminidase, palmitoyl protein thioesterase, alpha-glucosidase, and LAMP-1 are major lysosome proteins. Evaluation of said proteins would clearly identify lysosomal disorders. Therefore the technical feature recited in claims 1-38 is not a contribution over the prior art. Accordingly the groups set forth below are not so linked as to form a single general concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20 and 36, drawn to a method of assessing lysosomal storage disorder via the measurement of only *saposin*.

Group II, claim(s) 21-25, 37, and 38, drawn to a method of assessing lysosomal storage disorder (such as acid lipase disease and Pompe's disease) via the measurement of only *alpha-glucosidase*.

Group III, claim(s) 26 and 29-35, drawn to a method of assessing lysosomal storage disorder via the measurement of *saposin*, *alpha-glucosidase*, and *LAMP -1/2*.

Group IV, claim(s) 27, drawn to a method and kit for assessing lysosomal storage disorder (Pompe's disease) via the measurement of *alpha glucosidase and saposin*.

Group V, claim(s) 28, drawn to a method of assessing lysosomal storage disorder via the measurement of *saposin and LAMP-1*.

Art Unit: 1641

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: As set forth above in view of the teachings from Chataway et al. the groups are not so linked as to form a single general concept under PCT Rule 13.1 because the technical feature shared by Groups I-V is not special.

Five different methods are presented in Group I through V. Each method requires the detection of diverse compositions, which are not totally inclusive of the other. Each requires separate search and consideration with respect to lysosomal disorders. Thus the inventions I-V are patentably distinct.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different searches in the patent literature, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Joe Liebeschuetz (37,505) on 10/9/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Art Unit: 1641

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Papers related to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform to the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The Central Fax number is (703) 872-9306, which is able to receive transmissions 24 hours/day, 7 days/week.
